Office Action Summary	Application No. 10/590,966	Applicant(s) FUNAHASHI ET AL.	
	Examiner HUYEN D. LE	Art Unit 2615	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Funahashi (JP 2004-304512) as cited by the Applicant.

Regarding claim 1, Funahashi'512 teaches a cylindrical frame (18), a magnetic circuit (9) disposed on an inner bottom face of the frame, a voice coil (14) having a coil portion (15) disposed in a magnetic gap (13), a diaphragm (16) fixed to the frame via a first edge (17) along an outer periphery thereof, a support (19) fixed to the diaphragm on a side of the magnetic circuit at one end and fixed to a vicinity of the magnetic circuit via a second edge (20) at the other end. As shown in the drawings, the first edge (17) is substantially analogous to the second edge (20) in shape as claimed.

Regarding claim 6, the first edge (17) and the second edge (20) are both formed of the urethane material.

3. Claims 1 and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Funuhashi (U.S. patent 7,324,659)

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Regarding claim 1, Funahashi teaches a cylindrical frame (12), a magnetic circuit (5) disposed on an inner bottom face of the frame, a voice coil (8) having a coil portion (7) disposed in a magnetic gap (6), a diaphragm (9) fixed to the frame via a first edge (10) along an outer periphery thereof, a support (13) fixed to the diaphragm on a side of the magnetic circuit at one end (13A) and fixed to a vicinity of the magnetic circuit via a second edge (11) at the other end (13B). As shown in the drawings, the first edge (10) is substantially analogous to the second edge (11) in shape as claimed.

Regarding claim 6, Funahashi teaches the first edge and the second edge which are made of substantially the same material (col. 5, lines 9-10 and lines 51-55; and col. 6, lines 4-5).

Allowable Subject Matter

4. Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Shteyn (U.S. patent 6,031,925) teaches a loudspeaker having a chassis, a cone, an actuator and a sub-frame.

Funuhashi et al. (U.S. patent 7,209,570) teaches a loudspeaker having an outer periphery of a suspension holder which is linked with a frame by a second edge.
